ASSEMBLY FLOOR FASTENING

WHAT YOU NEED

2 people

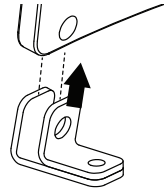

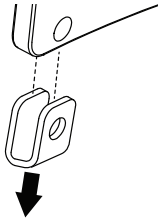

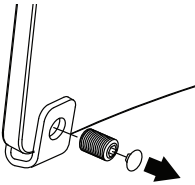

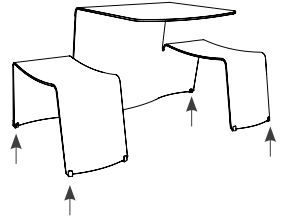

hex key no. 5

+/- 30 min.

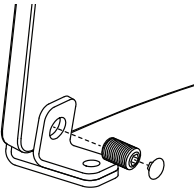

To anchor the Picnik table to the ground, 4 of the 6 already mounted stainless steel feet must be removed and replaced by the 4 stainless steel feet of the PFL04 ground anchor kit.

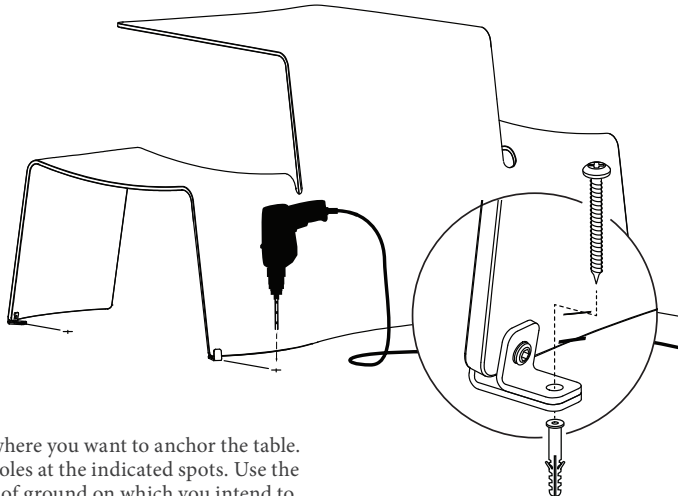

1. Remove the protection caps of the fastening screws of the 4 feet indicated on the above drawing and loosen these screws with a 5 mm Allen wrench.

2. Remove the feet.

3. Replace them by the 4 new feet. The side with the holes should always be facing inwards.

4. Put some Loctite 270 on the adjusting screws and tighten the 4 pieces for floor mounting with an Allen wrench number 5 and place the caps on it again.

5. Now mark the spots on the ground where you want to anchor the table. Put the Picnik table aside and drill holes at the indicated spots. Use the fixing media most suited to the type of ground on which you intend to install the Picnik table.

ASSEMBLY FLOOR FASTENING HEAVY DUTY

WHAT YOU NEED

2 people

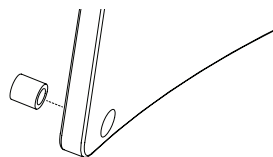

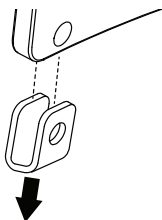

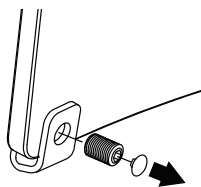

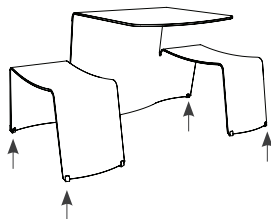

hex key no. 5

+/- 30 min.

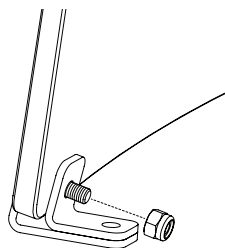

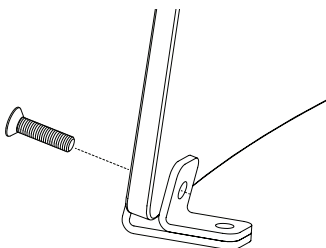

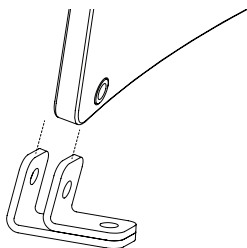

To anchor the Picnik table to the ground, 4 of the 6 already mounted stainless steel feet must be removed and replaced by the 4 stainless steel feet of the PFLHD04 ground anchor kit.

1. Remove the protection caps of the fastening screws of the 4 feet indicated on the above drawing and loosen these screws with a 5 mm Allen wrench.

2. Remove the feet.

3. Insert the spacers in the 4 holes used for anchoring the table to the ground.

4. Replace them by the 4 new feet. The side with the holes should always be facing inwards.

5. Fasten them by means of countersunk bolts M6 x 25.

6. Fix these with nuts M6.

7. Now mark the spots on the ground, as shown on page 16, where you want to anchor the table. Put the Picnik table aside and drill holes at the indicated spots. Use the fixing media most suited to the type of ground on which you intend to install the Picnik table.

ASSEMBLY PROTECTIVE FEET

WHAT YOU NEED

2 people

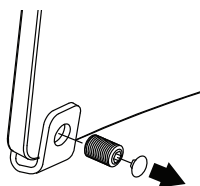

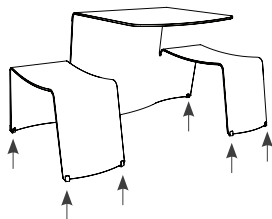

hex key no. 5

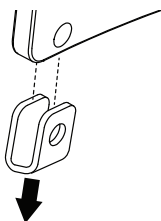

+/- 30 min.

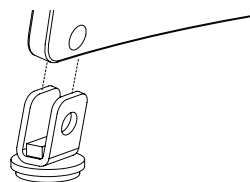

To fix the protective feet to the Picnik, all 6 mounted stainless steel feet must be removed and replaced by 6 stainless steel feet for delicate floors PP06 with felt on the bottom.

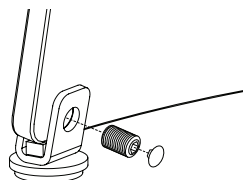

1. Remove the protection caps of the fastening screws of the 4 feet indicated on the above drawing and loosen these screws with a 5 mm Allen wrench.

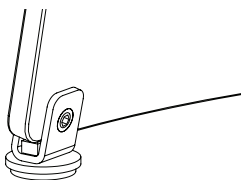

2. Remove the feet.

3. Replace them by the 6 new feet. The side with the holes should always be facing inwards.

4. Put some Loctite 270 on the adjusting screws and tighten the 6 pieces for floor mounting with an Allen wrench number 5 and place the caps on it again.

MAINTENANCE

POWDER COATED ALUMINIUM

Clean with lukewarm water and a mild detergent.

ALUMINIUM WITH HIGH GLOSS FINISH

Clean with lukewarm water and a mild detergent.

Superficial scratches can be polished out with a fine polish paste as used on cars. Then finish with a high gloss polish. If the damage is still visible, you can have the entire table repainted at a local car body shop.

Never use a high pressure cleaner!

STAINLESS STEEL

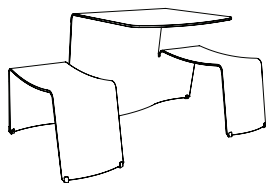

The rustproof steel plate is a high-quality polished plate protected by a self-adhesive PVC film that must be removed. The surface will inevitably get scratched, even during normal use. Major scratches can be avoided by never moving uneven or rough objects over the table's surface.

Stains can also appear, but most of them can be removed with generally available stainless steel cleaning products. After cleaning, but also immediately after the removal of the protective film and the rests of glue, you can apply a dirt-repelling film by spraying a silicon spray onto the plate and by spreading it out. Never put stainless steel in direct contact with metal as this can cause rusting.

MONTAGE GRONDVERANKERING

BENODIGDHEDEN

2 personen

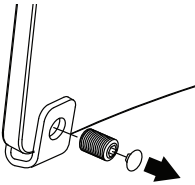

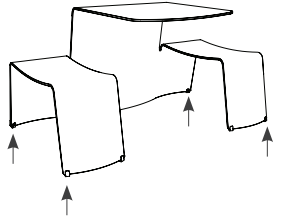

inbussleutel nr. 5

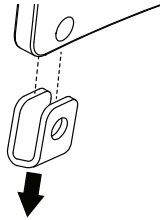

+/- 30 min.

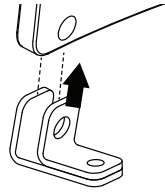

Om de Picnik te verankeren aan de grond moeten 4 van de 6 roestvast stalen voetjes (die gemonteerd geleverd worden) vervangen worden door de grondverankeringsset PFL04. De set voor grondverankering voor de Picnik bestaat uit 4 voetjes in roestvast staal.

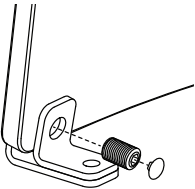

1. Haal de dopjes van de stelschroeven en draai de stelschroeven in de 4 aangeduide voetjes los met een inbussleutel #5.

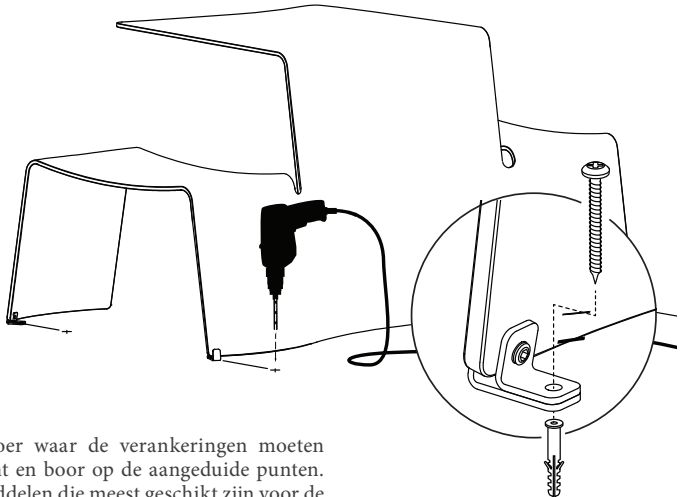

2. Verwijder de voetjes van het meubel.

3. Plaats de 4 nieuwe voetjes op dezelfde plaatsen op de Picnik. De opening wijst steeds naar de binnenkant.

4. Doe wat Loctite 270 op de stelschroeven en draai deze in de 4 stukken voor grondbevestiging vast met een inbussleutel #5 en plaats de dopjes er opnieuw op.

5. Markeer nu de plaatsen op de vloer waar de verankeringen moeten komen, schuif de Picnik aan de kant en boor op de aangeduide punten. Gebruik hiervoor de bevestigingsmiddelen die meest geschikt zijn voor de ondergrond waarop de Picnik moet staan.

2. Verwijder de voetjes van het meubel.

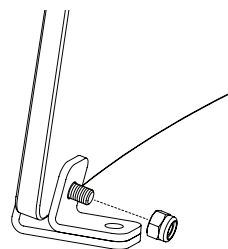

3. Plaats de diktebusjes in de 4 stukken voor grondbevestiging.

4. Plaats nu de 4 nieuwe voetjes op dezelfde plaatsen op de Picnik. De opening wijst steeds naar de binnenkant.

5. Monteer deze d.m.v. verzonken binnenskeskanbouten M6 x 25.

6. Bevestig deze nu met moeren M6.

7. Markeer nu de plaatsen op de vloer zoals op pagina 4 waar de verankeringen moeten komen, schuif de Picnik aan de kant en boor op de aangeduide punten. Gebruik hiervoor de bevestigingsmiddelen die meest geschikt zijn voor de ondergrond waarop de Picnik moet staan.

MONTAGE BESCHERMVOETJES

BENODIGDHEDEN

2 personen

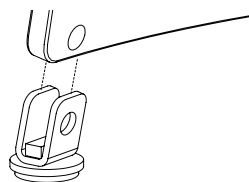

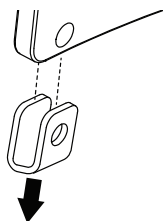

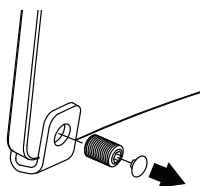

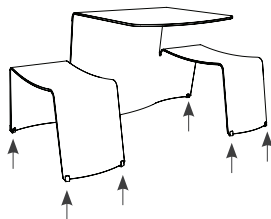

inbussleutel nr. 5

+/- 30 min.

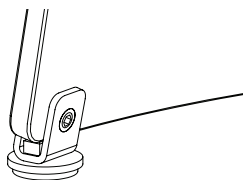

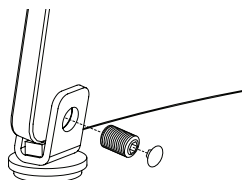

Om de beschermvoetjes te bevestigen aan de Picnik moeten alle 6 roestvast stalen voetjes (die gemonteerd geleverd worden) vervangen worden door de beschermvoetjes voor delicate vloeren PP06. De set voor beschermvoetjes voor de Picnik bestaat uit 6 voetjes in roestvast staal met onderaan vilt.

1. Haal de dopjes van de stelschroeven en draai de stelschroeven in de 4 aangeduide voetjes los met een inbussleutel #5.

2. Verwijder de voetjes van het meubel.

3. Plaats de 6 nieuwe voetjes op dezelfde plaatsen op de Picnik. De opening wijst steeds naar de binnenkant.

4. Doe wat Loctite 270 op de stelschroeven en draai deze in de 6 stukken voor grondbevestiging vast met een inbussleutel #5 en plaats de dopjes er opnieuw op.

ONDERHOUD

GEPOEDERCOAT ALUMINIUM

Reiniging met lauw water en zacht reinigingsmiddel.

ALUMINIUM GLANSLAK

Reiniging met lauw water en zacht reinigingsmiddel.

Ondiepe krassen kan men verwijderen door het materiaal te behandelen met polijstpasta zoals men ook gebruikt bij auto's. Het materiaal nadien best nog eens symoniseren met hoogglans beschermer.

Indien de schade nog steeds niet hersteld is, kan men deze steeds laten herlakken bij een plaatselijke carrossier.

Gebruik in geen geval een hogedruk-reiniger!

ROESTVAST STAAL

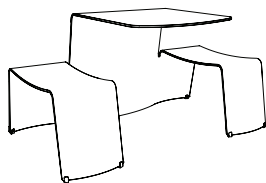

De roestvaste staalplaat is van hoogwaardige geslepen kwaliteit en voorzien van een zelfklevend PVC beschermfolie die verwijderd moet worden. Het is onvermijdelijk dat het oppervlak, ook bij normaal gebruik, zal krassen. Grote krassen kunnen vermeden worden door geen oneffen of ruwe voorwerpen te verschuiven.

Vlekvorming is eveneens mogelijk, maar dit kan voor het grootste deel verwijderd worden met inox-reinigingsproducten die in de handel verkrijgbaar zijn. Na reiniging, alsook dadelijk na het verwijderen van het beschermfolie en de lijmresten ervan, kan een vuilwerende film aangebracht worden door siliconespray op de plaat te spuiten en open te wrijven. Breng roestvast staal nooit rechtstreeks in contact met metaal, aangezien dit roestvorming kan veroorzaken.

4 x Edelstahlfüße

MONTAGE BODENVERANKERUNG

WAS SIE BRAUCHEN

2 Personen

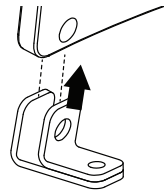

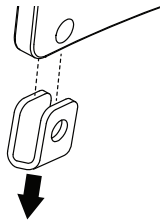

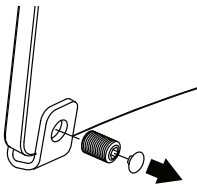

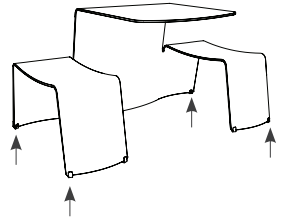

Inbusschlüssel Nr. 5

+/- 30 min.

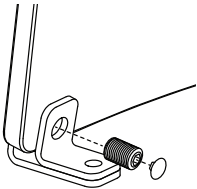

Um Picnik im Boden zu verankern müssen 4 der 6 Edelstahlfüße (die an Picnik montiert sind) durch die Bodenverankerung PFL04 ersetzt werden. Das Bodenverankerungsset für Picnik besteht aus 4 Edelstahlfüßen.

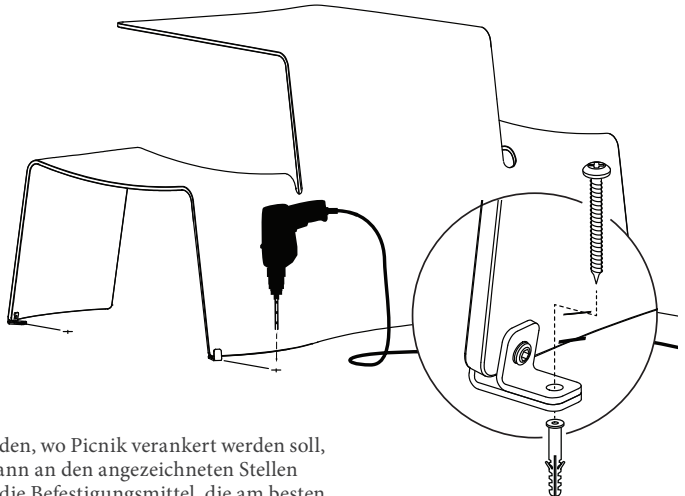

1. Die Kappen von den Stellschrauben abnehmen und die Stellschrauben der 4 angegebenen Füße mit einem Inbusschlüssel Nr. 5 herausdrehen.

2. Die Füße von dem Möbelstück abnehmen.

3. Die 4 neuen Füße an denselben Stellen von Picnik anbringen. Dabei weist die Öffnung zur Befestigung im Boden immer nach innen.

4. Stellschrauben mit 'LOCTITE 270' beträufeln und diese dann in die 4 Bodenbefestigungen einschrauben. Hierzu benutzen Sie einen Inbusschlüssel der Größe 5. Anschliessend die Kappen zurückstecken.

5. Markieren Sie jetzt die Stellen am Boden, wo Picnik verankert werden soll, und schieben Sie Picnik zur Seite. Dann an den angezeichneten Stellen Löcher bohren. Benutzen Sie hierzu die Befestigungsmittel, die am besten für die Unterlage, auf der Picnik stehen sollte, geeignet sind.

MONTAGE BODENVERANKERUNG HEAVY DUTY

WAS SIE BRAUCHEN

2 Personen

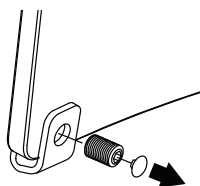

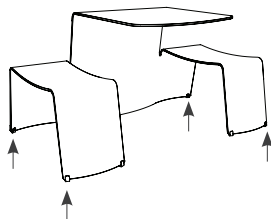

Inbusschlüssel Nr. 5

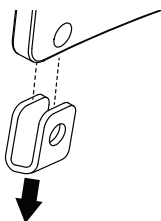

+/- 30 min.

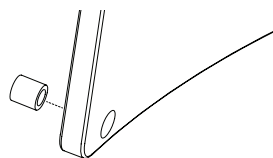

Um Picnik im Boden zu verankern müssen 4 der 6 Edelstahlfüße (die an Picnik montiert sind) durch die Bodenverankerung PFLHD04 ersetzt werden. Das Bodenverankerungsset für Picnik besteht aus 4 Edelstahlfüßen.

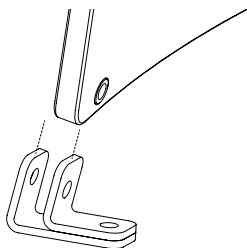

1. Die Kappen von den Stellschrauben abnehmen und die Stellschrauben der 4 angegebenen Füße mit einem Inbusschlüssel Nr. 5 herausdrehen.

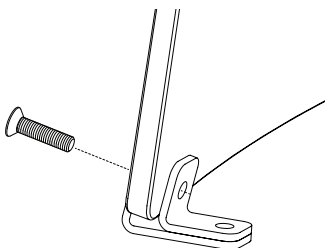

2. Die Füße von dem Möbelstück abnehmen.

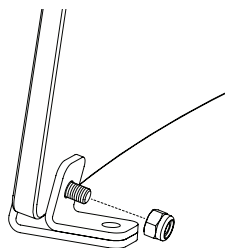

3. Setzen Sie die Verstärkungsröhrchen in die Löcher für die Bodenbefestigung ein.

4. Die 4 neuen Füße an denselben Stellen von Picnik anbringen. Dabei weist die Öffnung zur Befestigung im Boden immer nach innen.

5. Befestigen Sie sie mit Senkkopfschraube M6 x 25.

6. Befestigen Sie sie mit Muttern M6.

7. Markieren Sie jetzt die Stellen am Boden, wie auf Seite 22 gezeigt, wo Picnik verankert werden soll, und schieben Sie Picnik zur Seite. Dann an den angezeichneten Stellen Löcher bohren. Benutzen Sie hierzu die Befestigungsmittel, die am besten für die Unterlage, auf der Picnik stehen sollte, geeignet sind.

MONTAGE EDELSTAHLFÜSSE

WAS SIE BRAUCHEN

2 Personen

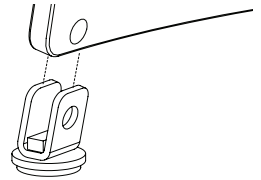

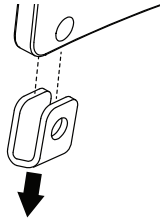

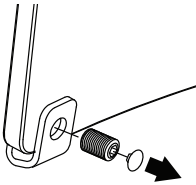

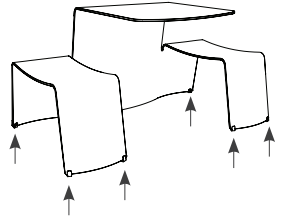

Inbusschlüssel Nr. 5

+/- 30 min.

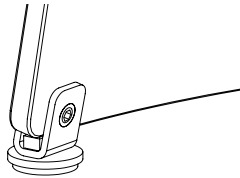

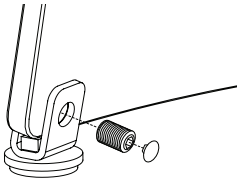

Um Edelstahlfüsse mit Filzschutz zu befestigen an den Picnik Tisch müssen 6 Edelstahlfüsse (die An Picnik montiert sind) durch die Edelstahlfüsse PP06 ersetzt werden.

1. Die Kappen von den Stellschrauben abnehmen und die Stellschrauben der 4 angegebenen Füße mit einem Inbusschlüssel Nr. 5 herausdrehen.

2. Die Füße von dem Möbelstück abnehmen.

3. Die 6 neuen Füße an denselben Stellen von Picnik anbringen. Dabei weist die Öffnung zur Befestigung im Boden immer nach innen.

4. Stellschrauben mit 'LOCTITE 270' beträufeln und diese dann in die 4 Bodenbefestigungen einschrauben. Hierzu benutzen Sie einen Inbusschlüssel der Grösse 5. Anschliessend die Kappen zurückstecken.

PFLEGE

ALUMINIUM MIT STRUKTURIERTE PULVERBESCHICHTUNG

Mit lauwarmem Wasser und einem milden Reinigungsmittel reinigen.

ALUMINIUM MIT GLÄNZEND PULVERBE- SCHICHTUNG

Mit lauwarmem Wasser und einem milden Reinigungsmittel reinigen.

Oberflächliche Kratzer lassen sich entfernen, indem man das Material mit einer Polierpaste behandelt, wie sie auch für Autos verwendet wird. Das Material danach am besten noch einmal mit Hochglanzschutz behandeln. Wenn der Schaden noch immer nicht behoben ist, kann man Picnik bei einem örtlichen Karosserielackierer neu lackieren lassen.

Verwenden Sie keinesfalls einen Hochdruckreiniger!

EDELSTAHL

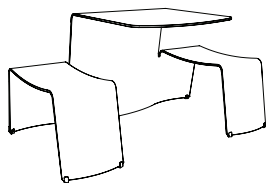

Die rostfreie Stahlplatte ist von hochwertiger geschliffener Qualität. Sie ist mit einer zu entfernenden selbstklebenden PVC-Schutzfolie versehen. Auch bei normaler Verwendung wird die Oberfläche zerkratzen. Vermeiden Sie aber große Kratzer, und verschieben Sie keine unebenen oder rauhen Objekte.

Flecke können ebenso vorkommen. Sie können aber mit den im Handel erhältlichen Inoxreinigungsprodukten zum größten Teil entfernt werden. Nach Reinigung sowie gleich nach Entfernung der Schutzfolie und deren Leimreste, kann ein Film gegen Verschmutzungen angebracht werden. Sprühen Sie dazu Silikonespray auf die Platte, und reiben Sie es auf. Bringen Sie Edelstahl niemals unmittelbar mit Metall in Kontakt, da dies Rostbildung auslösen kann.

MONTAGE ANCRAGE AU SOL

OUTILS

2 personnes

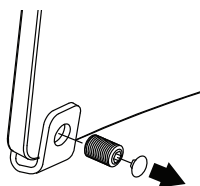

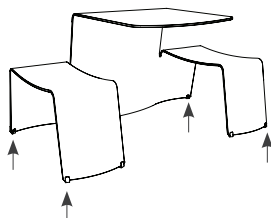

clé à lène n° 5

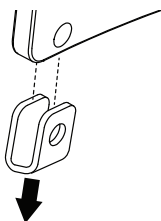

+/- 30 min.

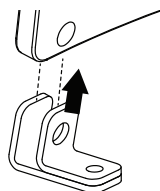

Pour fixer la table Picnik dans le sol, il faut remplacer 4 des 6 pieds en acier inoxydable (qui sont livrés déjà montés) par le kit de fixation PFL04. Le kit de fixation de la table Picnik dans le sol se compose de 4 pieds en acier inoxydable.

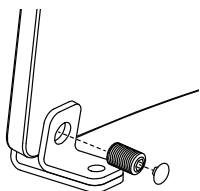

1. Ôtez les capuchons des vis de réglage des 4 pieds indiqués sur l'illustration et desserrez les vis au moyen d'une clé à lène #5.

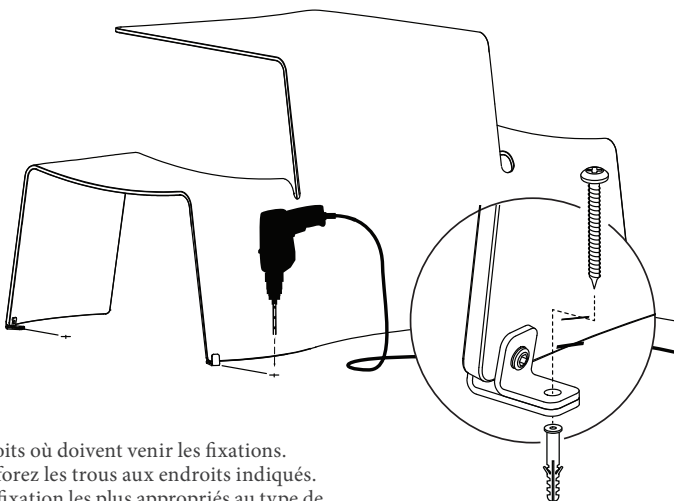

2. Retirez les pieds concernés.

3. Remplacez ces pieds par les 4 nouveaux pieds. Le côté avec le trou doit toujours être orienté vers l'intérieur.

4. Mettez un peu de Loctite 270 sur les vis de réglage et serrez les 4 pièces pour montage au sol avec une clé à lène n°5 et remettez les capuchons au-dessus.

5. Marquez à présent sur le sol les endroits où doivent venir les fixations. Poussez la table Picnik sur le côté et forez les trous aux endroits indiqués. fixez-la au sol à l'aide des moyens de fixation les plus appropriés au type de sol où vous entendez monter la table Picnik.

clé alène n° 5

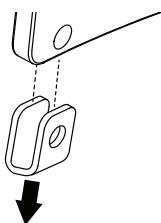

+/- 30 min.

Pour fixer la table Picnik avec des protections pour sols fragiles, il faut remplacer les 6 pieds en acier inoxydable (qui sont livrés déjà montés) par le kit de protections pour sols fragiles. Le kit de protections de la table Picnik se compose de 6 pieds en acier inoxydable avec du feutre.

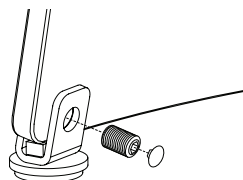

1. Ôtez les capuchons des vis de réglage des 4 pieds indiqués sur l'illustration et desserrez les vis au moyen d'une clé alène #5.

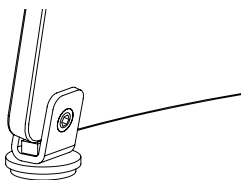

2. Retirez les pieds concernés.

3. Remplacez ces pieds par les 6 nouveaux pieds. Le côté avec le trou doit toujours être orienté vers l'intérieur.

4. Mettez un peu de Loctite 270 sur les vis de réglage et serrez les 6 pièces pour montage au sol avec une clé alène n°5 et remettez les capuchons au-dessus.

ENTRETIEN

ALUMINIUM PEINTURE POUDREE

Nettoyage avec de l'eau tiède et un détergent doux.

ALUMINIUM LAQUE BRILLANTE

Nettoyage avec de l'eau tiède et un détergent doux.

Les griffes superficielles peuvent être éliminées en traitant la table avec une pâte à polir similaire à celle que l'on utilise pour les voitures. Il est recommandé d'ensuite simoniser la table avec un produit de protection haute brillance. Si le dommage n'est pas réparé après ce traitement, il est possible de faire relaquier la table chez un carrossier.

N'utilisez en aucun cas de nettoyeur haute pression!

ACIER INOXYDABLE

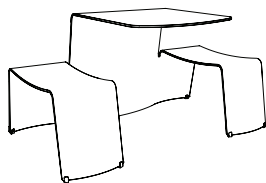

La plaque en acier inoxydable est de la plus haute qualité et est munie d'une feuille de protection en PVC adhésive qui doit être enlevée. La surface se rayera inévitablement, même en cas d'usage normal. On peut éviter les grosses rayures en n'y faisant pas glisser des objets rugueux ou inégaux.

Des taches peuvent aussi apparaître. Vous les éliminerez aisément grâce aux produits d'entretien de l'inox, disponibles dans le commerce. Après nettoyage, ainsi qu'après l'élimination effective de la feuille de protection et des restes de colle de celle-ci, vous pouvez appliquer un film insalissable en vaporisant un spray de silicone et en le frottant à l'air libre. Ne mettez jamais l'acier inoxydable au contact direct d'un métal; cela risquerait de provoquer la formation de rouille.

ASSEMBLAGGIO FISSAGGIO AL SUOLO

NECESSARIO PER IL MONTAGGIO

2 persone

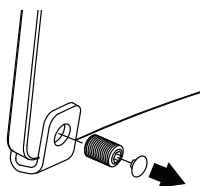

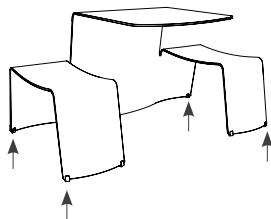

chiave a brugola n. 5

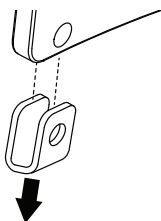

+/- 30 min.

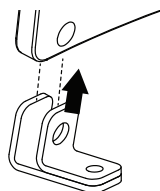

Per fissare Picnik al terreno, 4 dei 6 piedini in acciaio inox (che vengono forniti montati) devono essere sostituiti con il set di ancoraggio a terra PFL04, composto da 4 piedini in acciaio inox.

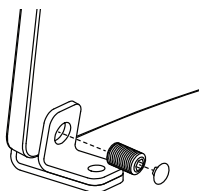

1. Togliere i cappucci dalle viti di regolazione nei 4 piedini indicati e svitare le stesse mediante una chiave a brugola da 5.

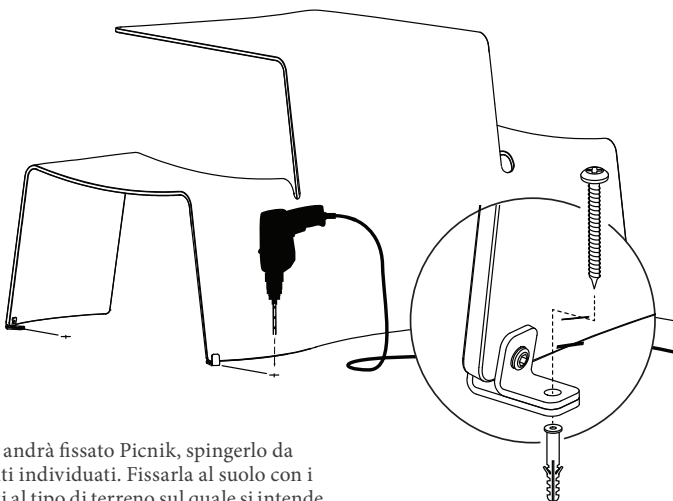

2. Staccare i piedini dal mobile.

3. Al loro posto applicare i 4 piedini nuovi. Il foro è sempre rivolto verso l'interno.

4. Avvitare le viti di regolazione nei 4 piedini per il fissaggio a terra utilizzando una chiave a brugola da 5 e rimettervi i cappucci.

5. Segnare ora sul terreno i punti in cui andrà fissato Picnik, spingerlo da un lato e forare con un trapano i punti individuati. Fissarla al suolo con i dispositivi di fissaggio più appropriati al tipo di terreno sul quale si intende posizionare il tavolo Picnik.

chiave a brugola n. 5

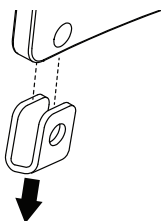

+/- 30 min.

Per fissare piedini protettivi al Picnik, 6 piedini in acciaio inox (che vengono forniti montati) devono essere sostituiti con il set di piedini protettivi PP06, composto da 6 piedini per pavimentazioni delicate.

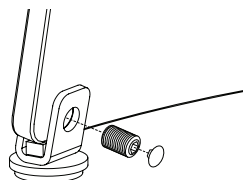

1. Togliere i cappucci dalle viti di regolazione nei 4 piedini indicati e svitare le stesse mediante una chiave a brugola da 5.

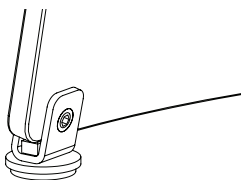

2. Staccare i piedini dal mobile.

3. Al loro posto applicare i 4 piedini nuovi. Il foro è sempre rivolto verso l'interno.

4. Avvitare le viti di regolazione nei 4 piedini per il fissaggio a terra utilizzando una chiave a brugola da 5 e rimettervi i cappucci.

MANUTENZIONE

ALLUMINO VERNICATO A POLVORE

Pulire con acqua tiepida e un detergente non aggressivo.

ALLUMINO LACCATO LUCIDO

Pulire con acqua tiepida e un detergente non aggressivo.

È possibile rimuovere graffi superficiali trattando il materiale con la stessa pasta per pulitura (polish) utilizzata per le automobili. È poi consigliabile lucidare ancora una volta la superficie con un prodotto protettivo brillante. Se il graffio non è comunque stato rimosso, è sempre possibile far riverniciare la superficie presso una carrozzeria di fiducia.

In nessun caso utilizzare un'idropulitrice!

ACCIAIO INOX

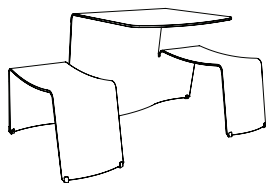

La lamina di acciaio resistente alla ruggine è una lamina lucidata di elevata qualità protetta da una pellicola in PVC autoadesiva che deve essere rimossa. La superficie sarà inevitabilmente graffiata, anche durante un uso normale. I graffi più evidenti possono essere evitati non spostando mai oggetti non uniformi o ruvidi sulla superficie del tavolo. Possono anche comparire macchie, ma la maggior parte possono essere rimosse con prodotti per pulizia dell'acciaio inossidabile generalmente disponibili.

In seguito alla pulizia, ma anche immediatamente dopo la rimozione della pellicola protettiva e dei resti di colla, è possibile applicare una pellicola repellente dello sporco spruzzando uno spray al silicone sulla lamina e cospargendolo con lo stesso. Non mettere mai l'acciaio inossidabile a diretto contatto con il metallo, poiché ciò potrebbe causare la ruggine.

CONTENIDO

1 x picnic

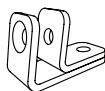

OPCIONAL

ANCLAJE AL SUELO

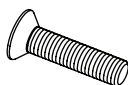

4 x anclaje al suelo

ANCLAJE AL SUELO HEAVY DUTY

4 x anclaje al suelo
heavy duty

4 x tornillo avellanado
M6 x 25

4 x tuerca M6

4 x distanciador

PIES PROTECTORES PARA SUELOS DELICADOS

4 x pies protectores para
suelos delicados

MONTAJE ANCLAJE AL SUELO

UTENSILOS

2 personas

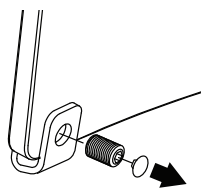

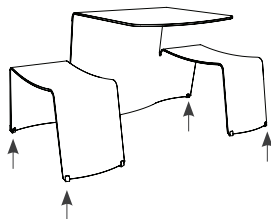

llave macho hexagonal
no. 5

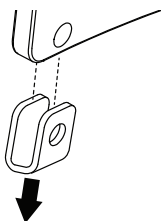

+/- 30 min.

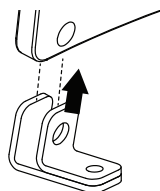

Para anclar la Picnik al suelo, hace falta reemplazar 4 de los 6 pies de acero inoxidable (premontados) por el conjunto de anclaje al suelo PFL04, que consiste de 4 pies de acero inoxidable.

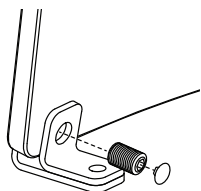

1. Quite los tapones de los tornillos de ajuste y destornille los tornillos de ajuste en los 4 pies marcados, empleando un llave macho hexagonal #5.

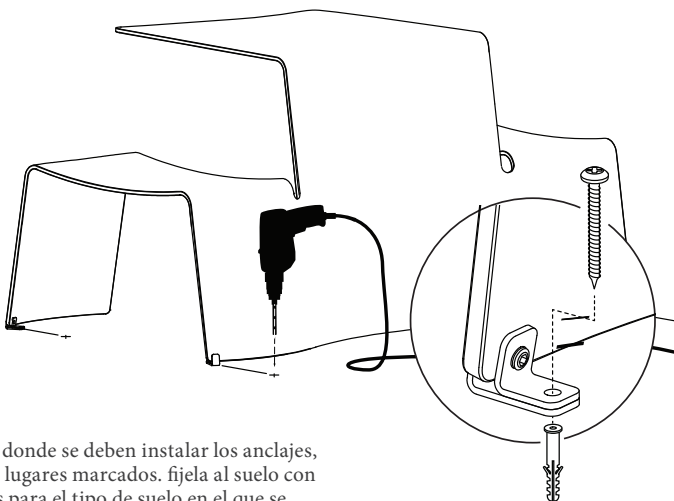

2. Quite los pies del mueble.

3. Monte los 4 pies nuevos en los mismos lugares de la Picnik. El agujero siempre señala hacia dentro.

4. Atornille los tornillos de ajuste en los 4 piezas del anclaje al suelo, empleando un llave macho hexagonal #5, y vuelva a colocar los tapones.

5. Ahora marque los lugares en el suelo donde se deben instalar los anclajes, deje de lado la Picnik y taladre en los lugares marcados. fijela al suelo con los medios de fijación más adecuados para el tipo de suelo en el que se encuentre la mesa Picnik.

4. Atornille los tornillos de ajuste en los 4 piezas del anclaje al suelo, empleando un llave macho hexagonal #5, y vuelva a colocar los tapones.

MANTENIMIENTO

ALUMINIO CON PINTURA EN POLVO

Limpiar con agua tibia y detergente suave.

ALUMINIO CON PINTURA BRILLANTE

Limpiar con agua tibia y detergente suave.

Para quitar arañazos superficiales, tratar el material con pasta de pulir como para coches. Después, dar brillo con una laca celulósica.

Si no se reparan los daños, dejar repintar por un empresa de carrocería local.

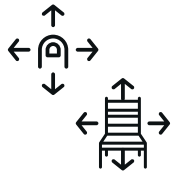

¡De ninguna manera emplear un limpiador de alta presión!

ACERO INOXIDABLE

La plancha de acero inoxidable y afilado de gran calidad está recubierta de un film protector de PVC, autoadhesivo y removible. Es inevitable que la superficie se raye aun bajo un uso normal. No se recomienda arrastrar objetos ásperos para evitar la formación de nervaduras.

También es inevitable que la superficie se manche, pero existen productos específicos de limpieza inox, de venta en las tiendas, para quitar en gran parte estas manchas. Una vez limpia la mesa, así como inmediatamente después de haber quitado el film protector y los una restos de cola, se puede aplicar película repelente de suciedad mediante un spray silicone. No ponga jamás en contacto directo el acero inoxidable con un metal, puesto que puede causar la formación de óxido.
