F.A.Q.

Q: How wind resistant is the shade?

A: Tests in a windtunnel have shown that the shade withstands wind speeds up to 8 on the Beaufort scale (74 km/h) when anchored to the floor. Still, we strongly advise to close it sooner (from 6 on the Beaufort scale is the rule of thumb (49 km/h)).

Q: Is the fabric 100% waterproof?

A: With light rain you stay easily seated underneath the shade. The fabric is slightly slanted in opened position. With heavy rain, the canvas lets through only a little bit of water. This is typical for the fabric and necessary, because the fabric should be able to ventilate.

Q: Can you remove the fabric for washing?

A: We do not advise this but it is possible. In the first place, you should close the parasol when you do not use it and protect it with its cover. This protects the parasol from getting dirty.

Q: Do you need to use a parasol cover?

A: The cover is needed to protect and fix the parasol when not in use. Protect your parasol from polluted rain, bird droppings, dust and heavy winds to avoid marks or stains on the parasol fabric.

Warnings

General

- Do not use any sharp tools to open the packaging.
- We strongly advise against using power tools.
- Tripping hazard, mind your step.
- Do not put out cigarettes on the parasol.
- Not graffiti proof.
- To avoid danger of suffocation, keep plastic bags away from babies and children.
- Colors can differ over years and from batch to batch.

Product

- Do not leave the parasol unattended when opened.
- Anchoring the product has to be done by qualified people.
- For anchoring: use suitable bolts or screws from a specialized store depending on the material your terrace is made of.
- If you hear the cables whistling due to heavy wind or if you are not using the parasol, close it and use the cover to avoid the parasol from opening or getting dirty.
- For ventilation purposes, the cover is not 100% waterproof.
- Ask for assistance when closing the parasol in

strong winds. Opposite the wind's direction, at least one person needs to guide the parasol's spines downwards in order to avoid the parasol from blowing open fiercely halfway down.

- Store the parasol when not in use for a long time as follows: vertically, completely dry and in a dry environment.
- Do not leave closed if not completely dry. Do not leave the parasol closed for a long time when the parasol fabric is still damp or wet.
- The fabric can be removed for washing but we do not advise this. In the first place, you should close the parasol when you do not use it and protect it with its cover. This protects the parasol from getting dirty.
- Tests in a windtunnel have shown that the shade withstands wind speeds up to 8 on the Beaufort scale (74 km/h) when anchored to the floor. Still, we strongly advise to close it sooner (from 6 on the Beaufort scale is the rule of thumb (49 km/h)).

High-tech polyester

- Shake or brush off loose dirt immediately.
- Do not use any aggressive detergents as they will remove the protective coating of the fabric.

- We strongly advise you not to use a high-pressure hose for cleaning.

Stainless steel

- Very good UV color fastness.
- Flame retarding: NEN-EN13501-1 A1 - Class A1 products will not contribute to fire in any stage, including fully developed fire. For this reason, they are assumed to be capable of satisfying all requirements of all lower classes as well.
- Watch out, stainless steel isn't entirely rustproof! Be sure to avoid contact with iron objects. If it does show signs of rust, clean with rust remover as quickly as possible.

Concrete

- Matt and porous.
- Very good UV color fastness.
- Flame retarding: NEN-EN13501-1 A1 - Class A1 products will not contribute to fire in any stage, including fully developed fire. For this reason, they are assumed to be capable of satisfying all requirements of all lower classes as well.
